## Experience

---

### Frontend Developer Internship

August 2022 - Current

Frontend Simplified

- Transformed a completely static HTML, CSS, JavaScript and React single page application into an interactive user interface using animations, transitions and carousels.
- Processed API requests with Axios to dynamically represent data from a cloud server and represented it through skeleton loading states, pagination and dynamic routing
- Utilized Git version control and the GitHub interface to work and thrive in a virtual and collaborative team environment

### Freelance Frontend Developer

October 2022 - Current

Self Employed

- Currently building professional websites using HTML5, CSS3, JavaScript and React best practices.
- Improved website performance by compressing, caching and lazy loading images and components.
- Included SEO, responsive, multi-platform and hosting support, enabling their website to be used by any browser or device in the world.

### Frontend Developer Support

December 2022 - Current

Frontend Simplified

- Supported students using HTML, CSS, Flexbox, JavaScript and React best practices.
- Utilized debugging best practices using Google Chrome inspect element tooling.
- Simplified difficult programming concepts including responsive website development, CSS layout, Promises and API requests.

## Projects

---

### Netflix Clone | [Website](#) | [GitHub](#)

- Created a fully responsive Netflix clone which pulls data from IMDB and displays movies based on the pre-selected category. The real-time update provides the latest selection of movies. Features are added to allow users to create accounts and save movies.

### Twitter Clone | [Website](#) |

- Developed a social media app with functionality such as Posting Tweets, Creating and Signing into accounts using data stored in Firebase/Firestore.

### Youtube Clone | [Website](#) |

- Integrated Youtube API to create a real-world search engine to sort Videos by categories, channel and keywords. Links to multi pages to allow for viewing of chosen video.

### Ecommerce Library| [Website](#) |

- Ecommerce store to purchase a collection of books. This mock ecommerce website has the potential to be launched into a functioning online store. Currently in negotiations with potential clients to use its functionality and turn the project into profit.

### NFT Store (Ongoing) |

- Currently working on an NFT store as an internship project for Frontend Simplified. This project will further improve my ability to use axios and pull data from APIs to use in creating a functional NFT portfolio website.

## Education

---

### Frontend Developer Bootcamp

August 2022 – Current

Frontend Simplified
